This European project 2019-1-SK01-KA204-060649 provides information about learning opportunities for people over 50, innovations of the programmes and training for low-skilled adults in digital technologies

What is SeLiD?

The main objectives are open education and innovative practices in a digital era, focusing on improving and extending high quality learning opportunities for digital technologies and ICT, tailored to the needs of individual low-skilled or low-qualified adults.

The project concentrates on learning and training of basic ICT skills and key digital competences of the elderly. Methods that will be applied are:

- classical teaching,
- group learning and training,
- peer learning,
- work with manuals,
- excursions to the shops with electronics,
- collection of good practices to develop digital literacy and skills of the elderly.

The project focuses on elderly students and older people in general to improve and develop their digital skills and knowledge. They need special education and training in many fields for a more flexible use of ICT in their daily life and for an active citizenship.

Outcomes

- Review table presenting study of learning possibilities of digital technologies
